Studied History

METROPOLITAN STATE UNIVERSITY
Studied History

➕ PROJECTS

"SAYWHAT?" TRANSLATION AND TRAVEL APP - G90 CAPSTONE   SEPT. 2018 TO SEPT. 2018
The 'SayWhat?' Translation and Travel app was my Galvanize WDI Capstone. This app includes full CRUD functionality and a new technology previously unknown to me. This new tech is the Google Cloud Machine Learning and AI to get the translation. In just 10 days I built this app that allows the traveler to translate any words, or sentences that they want. 'SayWhat?' will also the traveler to add countries they'd like to visit. Including the ability to create/update/delete currency type, primary language, wikipedia page, and top 3 attractions.

CRĀV - FOOD LOCATOR APP   AUG. 2018 TO AUG. 2018
CRĀV is an app built with 3 other developers in 4 days. We used a frontend framework that was previously unknown to all of us (Vue.js), and worked on feature branching to brush up our collaborating skills on github. We also built our back-end using node.js, knex, express, SQL, and deployed to heroku. Our objective was to learn to work as a team, learn a new frontend framework, and use feature branching on github.

MOVIE POSTER GENERATOR   JUNE 2018 TO JUNE 2018
Web app build with vanilla JavaScript, using 2 API's to fetch data.
